What?

What would you do if, for whatever reason, you did not have electricity or other conveniences that we have become so dependent on? Would you be able to get water from your well? Would you be able to keep your home warm? Would you be able have food? These are the most basic physical necessities of life, and they are topics that are just as applicable to those currently living in the country as to city dwellers. Almost everyone has become completely dependent for even these most basic necessities, in this modern society of ours. In the Country Living Seminars, we will be exploring how you can become as independent as possible for these basic necessities. How you can not only survive, but also thrive! So that you can be a help and blessing to others in the days ahead. And so you can be part of the solution, rather than part of the problem.
